m01nudd1n

Professional Summary

Business Analyst with 5+ years of experience translating business requirements into structured software solutions within Agile and SDLC environments. Proven ability to produce high-quality requirement documentation including functional specifications, business process flows, gap analysis, and user stories. Experienced in collaborating with Product Owners, Development, QC, and UI/UX teams to ensure solution validation, backlog prioritisation, and successful delivery of large-scale system enhancements. Strong analytical, communication, and stakeholder management capabilities.

Software Delivery & Requirements Impact — Amazon

- **Led** requirement clarification workshops for Program Website Audit 2.0, translating business needs into structured functional documentation and prioritised backlog items impacting 10+ marketplaces.
- **Produced** detailed requirement specifications and process flow improvements for semi-automated catalog scanning, reducing manual review effort by 40% and improving detection accuracy by 25%.
- **Defined** functional requirements, acceptance criteria, and validation scenarios for image-based classification enhancements, improving false positive accuracy by 20%.
- **Developed** KPI-driven governance documentation and solution validation frameworks to ensure deliverables aligned with evolving business requirements.
- **Conducted** gap analysis and workflow optimisation initiatives for class consolidation projects, improving operational scalability across global systems.

Core Competencies

Business Analysis & Documentation

- Business Requirements Documents (BRD) and Software Requirements Specification (SRS)
- Functional specifications and process flow modelling
- Gap analysis and workflow documentation
- User stories and backlog prioritisation

SDLC & Agile Delivery

- Agile / Scrum delivery environments
- Knowledge of SDLC methodologies
- Acceptance criteria definition and UAT coordination
- Solution validation and verification

Stakeholder & Cross-Functional Collaboration

- Product Owner partnership and roadmap support
- Collaboration with Development, QC, and UI/UX teams
- Escalation handling and issue resolution
- Strong analytical and presentation skills

Professional Experience

Amazon — Global Solutions & Risk Compliance (GSRC / RISC)

Bengaluru, India

Senior Compliance Associate — Program Health & Strategy (SME) 2022 – Jan 2025

- Translated complex regulatory and operational requirements into structured documentation including functional specifications and solution validation artifacts.
- Facilitated structured discussions between business and development teams to ensure clarity of requirements prior to implementation.
- Collaborated with QC during acceptance testing cycles to validate alignment between requirements and delivered solutions.
- Utilised SQL-based analysis and reporting to verify solution performance and ensure business objectives were met.

Senior Compliance Associate — Operations & Risk Analysis 2020 – 2022

- Gathered and documented business requirements supporting updates to compliance evaluation workflows and system enhancements.
- Conducted detailed process analysis and created structured workflow documentation for system improvements.
- Coordinated UAT activities and resolved requirement-related issues during implementation cycles.
- Identified and escalated complex issues to senior stakeholders while maintaining delivery timelines.

Technical Support Engineer — Enphase Energy

Mar 2025 – Nov 2025

Bengaluru, India

- Analyzed system-level technical issues and collaborated with engineering teams to define structured resolution pathways.
- Documented recurring defects and contributed to continuous improvement and product enhancement initiatives.

Education

Bachelor of Technology (B.Tech) — HKBK College of Engineering, Bengaluru

Certifications

- AWS Solution Architect (In Progress)
- Data Science & Analytics Certification
- Power BI & Tableau Certification
